

# **DERMATOLOGIST CLINIC MANAGEMENT SYSTEM**

## **Abstract**

The Dermatologist Clinic Management System has been developed to override the Problem prevailing in the practicing manual system. The main objective of the Project is to manage the details of, Doctor, Patient, Appointment. It manages all the information about Clinic, Booking, Appointment, patient portal. In this we are adding a new feature from existing system that is home care service and another one is user can book for particular doctor webinar, seminar and classes on specific topic totally built at administrative end and thus only the administrator is guaranteed the access.

## **Software Requirement**

Frontend: HTML/CSS

Backend: python Django
